Heat Pump Serial Numbers

Nr 1

Nr 2

Nr 3

Nr 4

Nr 5

Nr 6

Check list before booking commissioning

› Photo of the silver product information label on all heat pumps (must include legible serial number) ☐

Hydraulics

- › All pipework flushed, and strainers cleaned
- › Hydronics system filled to 1.5 bar with no leaks
- › Air bled from system
- › Expansion Vessel Pre-Charge Pressure (0.8 - 1.2 bar)
- › Pipework according to design combi and flex installations only
- › Dimensions of pipework flex only
- › Automatic air vents located at all high points and open
- › Are all isolation valves open
- › Check valves are installed for circulation pumps

Potable supply

- › Incoming pressure below ECV rating
- › Tanks filled and vented
- › All valves are open
- › Pipework flushed, vented, pressurised and tested for leaks
- › Dimensions of pipework

Wiring

- › Position and at which tank sensor X1.8 has been positioned
- › All wiring completed
- › Photos of the wiring to the WPM
- › Photos of wiring to heat pumps if flex
- › ISG LAN cable network connected and available (ISG is in the electrical enclosure, left side)

Installation

- › All pipework insulated
- › Pump covers applied on each pump
- › Heat pumps / Skid levelled
- › Drainage for PTR, ECV and condensate installed
