

STIEBEL ELTRON

The SNU Plus Open Vented Storage Water Heater

Pre-configured SNU Plus packages with compatible tapware

The SNU Plus 5 & 10

Open Vented Storage Water Heater

Compact water heaters delivering instant, safe, and energy-efficient performance

The SNU Plus is a compact, stylish small water heater/s providing instant hot water to individual fixtures such as kitchen sinks, and are designed for use with non-pressurised tapware only. Precise temperature control is achieved via a high-quality rotary selector, while anti-drip technology reduces limescale and water waste. High-grade thermal insulation and an energy-saving thermostat minimise heat loss and standby consumption. Installation is fast and straightforward thanks to the Profi-Rapid system, standard mounting points, and splashproof design. Safety features include a durable copper heating element, resettable high-limit cut-out, frost protection, and anti-scald temperature limiting.

Product features

- › Designed for single isolated sink
- › Energy and water savings
- › Low minimum standby power consumption
- › To be fitted with specialised STIEBEL ELTRON open vented tapware
- › Made in Germany

The STIEBEL ELTRON MES and MEW single-lever sink mixers are designed for use with the SNU 5 and SNU 10 compact storage water heaters. As the SNU is an open-vented system, one of four approved STIEBEL ELTRON tap styles must be fitted. Both mixers feature a short or swivel spout design, have a three-star WELS rating, and deliver a maximum flow rate of 8 litres per minute.

Package Table

The SNU 5 and SNU 10 can be supplied as a standalone unit for replacement or as part of pre-configured packages with approved STIEBEL ELTRON tapware. Package options are available with either Mes, Mew, Fixed or Gooseneck taps in a range of finishes, providing a complete, compatible solution. Individual taps are also available separately, allowing flexibility for changeover applications or custom system configurations.

Product	Article Number	Flow Rate
SNU Plus 5	204977	-
SNU Plus 10	204982	-
MES	232389	8 L/min
MEW	232392	8 L/min
SNU 5 + MES	232381	8 L/min
SNU 5 + MEW	232384	8 L/min
SNU 10 + MES	232377	8 L/min
SNU 10 + MEW	232380	8 L/min

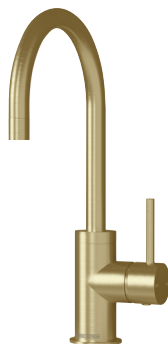

The Gooseneck Tap for the SNU Plus

Stylish convenience at your fingertips

The Design-Kollektion 160mm Gooseneck mixer combines modern design with precision functionality, delivering hot and cold water to a single fixture, such as a kitchen sink. The curved spout provides ample clearance, while the side lever allows for smooth, effortless control. Available in Brushed Nickel, Chrome, Brushed Gold and Matte Black, this tap integrates seamlessly into various interiors. Designed exclusively for the SNU Plus open-vented storage water heater, it provides readily available hot water when needed.
